## Over \$230 Million in Balanced Power homes were purchased in 62 days by Southern California home buyers!

During July and August, Southern California builders sold 11,537\* BALANCED POWER homes valued at \$230 million.

During this recent two-month period most new homes sold were BALANCED POWER homes.

Why the overwhelming preference?

Simply this: BALANCED POWER is the logical, common-sense approach to modern home design.

All BALANCED POWER homes are equipped with both gas and electricity. Each power is assigned to the jobs it does best.

Modern gas does such jobs as cooking, heating, clothes drying, and water heating. Adequate wiring is provided for lighting, TV sets, vacuum cleaners, and small appliances.

This means that 11,537 Southern California home buyers who shopped for easiest living at lower cost found exactly what they wanted in BALANCED POWER homes.

Two strong Junior Varsity teams Two strong Junior Varsity teams battled to a draw last evening at Palm Springs High School field, when the Indians and He me t Bulldogs played to a 7-7 tie. It took a gigantic effort by the Indians' Joe Mayfield lucky No. 13 -to haul speedy Hemet halfback David Jones down on the Springs yard line to preserve the tie.
With two seconds left to play Jones took a hand-off on his own 29 and raced 50 yards before Mayeld could catch him.

Complexion Changes

Complexion of the game chang-d rapidly in the heart-stopping th quarter with Palm Springs Hemet taking turns churning yardage. Less than a minute ore the Jones get-away, the Indians moved relentlessly down the ld on thrusts through the line Jerry Olvera and Cliff Roughonly to be held on their own

Olvera, who place-kicks like a professional, tried a field - goal with 40 seconds left from the 28—a total of 38 yards from the cross-bars—but the hurried kick was not square and the ball was fear there.

The Indians elected to stay on the ground in the fourth quarter drive although quarterback Paul Summers had good success toss-ing the pigskin earlier in the game. He tried three, completed wo and had one intercepted.

Indians Pass Scores

It was his second pass, in fact, which brought the Indians Ione re. After a Hemet score ended first quarter — a 75 yard run Patrick - Palm Springs took kick-off and moved from its own 35 to the Bulldogs goal-line. All the yardage was made by runs except the last 16 which was con ered by Summers' pass to Grady

The drive was featured with runs by Roughley, Rivers, May-field, Olvera and Leo Richardson with the score coming seven minutes into the second period.

Hemet's score was set up by Summers' only intercepted pass Both Points Good

Thursday, Oct. 12, 1961

### Vigilance Is the Answer

This has to do with a word that long was taboo in the desert area and people who mentioned it were sharply told to shush, they didn't know what they were talking about.

Experts, however, tell us that we had better mention it and recognize it as a threat. We cannot prevent smog by ignoring it. In an illuminating article in Desert Magazine, Erwin Kaup-

er, senior meteorologist for the Los Angeles County Air Pollution Control District, disclosed the cause of smog and the possibilities of air pollution in the desert area.

The author declared that we cannot blame any traces of air pollution in the desert entirely on the Los Angeles Basin.

Air pollution does drift across the mountains and through San Gorgonio Pass. The yellowish-brown cloud can be seen emanating from the Pass from any portion of the valley. But the haze we find here on occasion is not all from this drift. Studies of air flow have shown that some of it in Coachella Valley is homemade.

While there is no firm record of haze in the desert area to prove or disprove their statements, many old-timers say there never was a day in the old days when the mountains around us didn't stand out, clear cut and seemingly close enough to touch. These days, they add, the mountains are often obscured.

The ballooning traffic - automobiles and trucks - are adding to the chances of smog, they claim. Industries are closer to the Pass, citing Fontana's steel mills and Colton's cement plants. In addition, high winds kick up the sand, filling the air with

Mr. Kauper adds a reassuring note. Most of the eye irritant in the smog that does reach the desert from Los Angeles, has been lost by the time it arrives here.

He also adds the comforting note that "luckily the desert is not a region in the forefront of industrial and commercial development."

With air pollution control engineers muzzling emissions of particles which cause eye irritation and with devices to rob automobile and truck exhaust of their part in creating smog, the desert area is in a favorable situation as of now.

We can afford to wait developments in the crowded coastal area, Mr. Kauper says.

But we are entitled to our fresh, clean air, long the lure of the desert. And if there is a threat that it COULD happen here in some future time, we must remember that the only way to prevent it is through vigilance.

### Out of the Frying Pan

This is the 50th annivarsary of Fire Prevention Week. Since 1911, the fore part of October has been set aside to give thought to the precautions we should - and must - take to prevent fire on the theory that an ounce of prevention is worth a ton of fire fighting.

Most of us know by heart the causes of fires, inadequate electrical wiring, careless smoking, piling up oily rags and so

But from Saginaw, Mich., comes the story of a new way to start fires. Firemen, rushing to a blaze in a suburban home
